

FUND SNAPSHOT

MAPLE LEAF 2013 FUND

Maple Leaf 2013 Oil & Gas Income Limited Partnership (the "Fund") has now consummated two strategic investments which meet the mandate of the fund. The investments consist of gross over-riding royalties ("GORR's") concentrated in west central Alberta on existing producing wells, development prospects and undeveloped lands.

The Fund's investment highlights are the following:

■ **Investment #1** is a petroleum and natural gas overriding royalty purchase and sale agreement for a total of \$7 million. This agreement provides the Fund with a 3% GORR on all existing production and all land (approx. 100,000 acres) and as a result, the fund is well positioned to realize significant upside should the lands that are prospective for oil and gas development ultimately be drilled and produce hydrocarbons. Further, a portion of the \$7mm will be utilized to participate in the drilling of 2 development wells in return for an additional 7% GORR (10% total GORR).

■ **Investment #2** is an unrelated royalty on two producing natural gas wells in the Ferrier area of Alberta. The acquisition consists of a 9.448% GORR on natural gas and liquids and provide predictable cash flow and long life reserves.

■ **Potential Investment #3** The Fund has entered into a non-binding Letter of Intent ("LOI") with an operator for a 3% corporate wide GORR on existing production including approximately 80,000 acres of potential development lands. This LOI is subject to the operator being able to finance its share of the cost of drilling 2 horizontal multi-frac wells.

The Fund's first cash distribution is \$0.30 per limited partnership unit from the revenue received from July's production.

The Fund is currently negotiating potential acquisitions with several operators and looks forward to completing the investment mandate of the Fund in the fourth quarter.
